You should not necessarily draw any conclusions about the Fund's investment performance from the amount of this distribution or from the terms of the Fund's Distribution Plan.

The Fund estimates that it has distributed more than its income and net realized capital gains; therefore, a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the Fund is paid back to you. A return of capital distribution does not necessarily reflect the Fund's investment performance and should not be confused with "yield" or "income".

The amounts and sources of distributions reported in this notice are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the Fund's investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The Fund will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

* Please note that the Fund's Distribution Plan includes a quarterly distribution equal to 2.5% of its Net Asset Value as of the last business day of the calendar quarter. The distribution rate shown above differs from the 2.5% stated amount (10% annualized and 5% year-to-date) as a result of the calculation using the cumulative fiscal year distribution rate divided by the Net Asset Value as of the last business day of the most recent calendar quarter end.
